# E-Mall (Property Management)

"It is a property management website application. Used HTML, CSS, BOOTSTRAP and JS to develop, functional and responsive UI for both mobile and desktop users. Used Servlets, JSP and JDBC to connect the UI with the middleware on Tomcat Server, which interacted with MySQL database using optimized and responsive SQL Queries."

- Rajdeep Saha

Objectives

- Web/Mobile Application for easy property management.
- Two users – Marketing Staff & Space Owner
